Every month or so, a group of artists meet for a coffee (and group therapy session) as they navigate the highs, lows and moments of calm, life as a female artist in Melbourne offers. The nurturing and supportive qualities of the group can also be felt in their varied art practices. Their muses are humble objects, plants and flora, reflections on simple things that mean everything. A feeling of warmth echos throughout their quiet compositions that somehow make you feel at home.

'Hearth' is a celebration of the group, their shared love of still life, and the connections art creates within communities and ourselves.

From organic and expressive mark making, to quiet and humble compositions, while each artist's interpretation (and coffee order) is distinctly their own, a soft sense of cohesion unites their work.
